

Formulary Three Drug Coverage

Commonly Prescribed Drugs Not Covered

Formulary Three does **not** cover many commonly prescribed brand drugs. It is limited to generic drugs for most classes, but does include brand name drugs in classes where no generic is available.

We are providing this list of commonly prescribed drugs that are **not** available on our formulary with some options that are being used to treat the same or similar conditions. If you are currently taking any of these non-covered medications, please share this list with your physician to discuss the best course of treatment for you.

IMPORTANT NOTE: This is **not** a complete listing of every drug that is **not** available on our Formulary Three.

Key: OTC = Over the counter / lowercase = generic / UPPER CASE = Brand
